

## TOPAKUSTIK® type ARIA- Plus 12/4M, 28/4M - data sheet

TOPAKUSTIK® type ARIA-Plus 12/4M, 28/4M - „quiet design“

The ARIA- Plus types in yellow spruce with knobs or in white fir with finger joints provide a unique quiet surface design with fine grooves and a deep look into the black background. The product is a composition of natural materials in hardwood and a middle layer of MDF without added formaldehyde. Surface finishes are water based.

TOPAKUSTIK® type ARIA- Plus

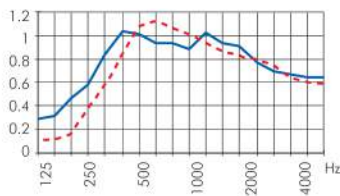

The perforation is barely visible thanks to the deep grooving and the black MDF board in the middle layer. The grooves create the effect of individual bars.
