

TOPAKUSTIK® / TOPPERFO® type ARIA - Data sheet

- Produced from spruce- and fir wood
- Partly combined with black MDF core board without added formaldehyde
- On request available with lifelike UV-light protection impregnation
- For wall application: Protection against dirt using natural water-based paint.
- All surface treatments are water-based: Our contribution for sustainable building in modern architecture!

ARIA-Plus - Simple design

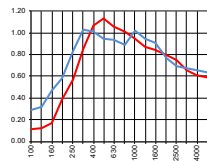

TOPAKUSTIK® type ARIA-Plus 12/4M, 28/4M, RL3, RL4

The deep grooving into the black core board provides a depth effect, which accentuates the solid areas as single pinewood strips. ARIA-Plus is available in Spruce with knots or White Fir with finger joints.

ARIA-Plus 28/4 M

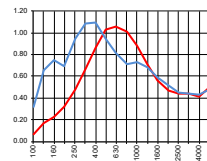

12/4 M - 15 %
